Jörg von der Gathen has participated successfully in

PREMIUM SANDING TRAINING (PST®)

In the foreground was the application concept of LÄGLER which enables to obtain premium wooden surfaces in the shortest time due to perfectly synchronised machines, abrasives and working processes.

Topics in the theoretical part:

- Historical development of the treatment of wooden floors
- Types and applications of different machines
- Ergonomics at handling
- Job safety in matters of dust emission
- Official regulations of associations
- Application of special sanding techniques in order to achieve an optimal sanding pattern
- Grit sizes and sanding materials
- Grit sequences
- The application concept of LÄGLER for premium wooden surfaces with HUMMEL®, TRIO, FLIP

Topics in the practical part:

- Type, construction, application and operation of the floor sanding machines HUMMEL®, TRIO, FLIP and SINGLE
- Application of different abrasives
- The new application concept of LÄGLER for premium wooden surfaces with HUMMEL®, FLIP and TRIO.
